

COMPLETING A USMCA/CUSMA CERTIFICATE OF ORIGIN

COMPLETING A USMCA/CUSMA CERTIFICATE OF ORIGIN

The United States-Mexico-Canada (USMCA in the US), Canada-United States-Mexico (CUSMA in Canada) Agreement came into effect on July 1, 2020, replacing the North American Free Trade Agreement (NAFTA).

A Certificate of Origin is required to obtain preferential tariff treatment and it must be completed accurately, and in full. With USMCA/CUSMA there is no specific format for a Certificate of Origin as there was with NAFTA, but it is still required that data elements be reported in order to verify that goods qualify for free trade under the rules and regulations.

- May be completed by the exporter, producer, or importer of the goods
- Electronic and digital signatures are acceptable
- Goods that are included on a shipment but do not qualify for USMCA / CUSMA should *not* be listed on a USMCA / CUSMA certificate.
- A USMCA / CUSMA certificate can be either a one-time or a blanket. A one-time is only good for the shipment it is completed for, while a blanket USMCA / CUSMA certificate is good for the specified period of time indicated on the certificate, up to a 12 month period. (On both types the date field must be completed.)

Understanding the Different USMCA / CUSMA Criterion Under Rules of Origin

When a USMCA / CUSMA certificate is applied to goods, it must qualify under one of the criterion A-E.

Criterion A: The good is wholly obtained or produced entirely in the territory of one or more of the USMCA countries, as defined in Article 4.3 of the Agreement;

Criterion B: The good is produced entirely in the territory of one or more of the USMCA countries using non-originating materials, provided the good satisfies all applicable requirements of product-specific rules of origin;

Criterion C: The good is produced entirely in the territory of one or more of the USMCA countries exclusively from originating materials; or

Criterion D: The good is produced entirely in the territory of one or more of the USMCA countries. It is classified with its materials, or satisfies the "unassembled goods" requirement, and meets a regional value content threshold of not less than 60% if the transaction value method is used, or not less than 50% if the net cost method is used (not including RVC for autos); except for goods in Chapter 61-63 of the HTSUS.

Criterion E: The goods provided for under the tariff provisions set out in Chapter 2 - Table 2.10.1, Table 2.10.2, and Table 2.10.3.
